SECURE EMAIL SERVICE DETAILS

→ 3 simple steps to encrypt an email to your customer

1

Using webmail, write an email and select the encryption box. Create a question and answer for the recipient to enter. The encrypted email is now ready to send.

Send Save draft Discard

To: info@pccybersecurity.com

[Add Cc](#) | [Add Bcc](#)

Subject: Financial Assessment Report

Encrypted: Yes

Type a secret question and answer that can only be answered by the recipients.

Question: When was our last meeting mm/dd/yyyy/hh/mm?

Answer: 07/15/2015/12/00

2

The recipient receives the email and is asked to answer the designated question to decrypt the message.

Read your secure email

Your message has been protected using a question and answer which was created by the sender. You must correctly answer this question, word for word, to retrieve your message. You will be limited to five incorrect responses.

Question: When was our last meeting mm/dd/yyyy/hh/mm?

Answer:

3

The recipient may reply to the email using a secure web session and this retains email encryption.
